Bee Valve Features Safety in it's Couplers & Adapters

Elyria, OH—Bee Valve's three most popular lines of couplers feature safety latches as standard on all couplers from 1-1/4 " to 3" plus the 4" nylon coupler. All Bee Valve couplers feature stainless steel handles, rings and pins and all the lines are non-conducting and chemical resistant to most acids. Bee Valve couplers and adapters are manufactured to MIL-specs and are interchangeable with other manufacturer's couplers and adapters.

Bee Valve Inc. is a manufacturer and distributor of low-pressure fluid control and handling products and offers a complete line of ball valves, couplers, adapters, strainers, fittings and gauges.

Nylon Couplers & Adapters

- Strong—resists cross threading, thread seizure and “out-of-round” condition
- Temperature range under normal conditions -30°F to 200°F
