Schedule 80 Poly Pipe Fittings Available from Bee Valve

Bee Valve Inc. manufactures and distributes a full line of Schedule 80 pipe fittings. These fittings are produced from glass-reinforced polypropylene for strength and durability. Polypropylene is the lightest of the thermoplastics. It has good resistance to most acids and is also a non-conductor of electricity.

Bee Valve's Schedule 80 fittings are available in sizes from 3/8" to 3". Fitting configurations include tees, elbows, crosses, nipples, bushings, couplings, caps and plugs.

A complete line of hose, tube, pipe and nozzle fittings in a variety of materials are available. Contact Bee Valve or visit www.BeeValve.com.
